ABOUT ISELI

IseLi, based in the Swiss city of Schötz, is proud of more than 70 years of tradition and know-how in the sharpening and processing of band-, gang-, and circular- saw blades. Its constant dialogue with its customers enables ISELI to develop sharpening machines and solutions, setting world standards for the industry. Furthermore, ISELI offers innovative and practical solutions for rational stelling, swaging and measuring of band- and circular saw blades, as well as for the sharpening of industrial blades, chainsaws and hand tools.

As a traditional family operated business in the third generation, ISELI develops products with the latest technologies combined with excellent engineering - Made in Switzerland.

The focus remains on economic and ecological requirements.

ISELI keeps its reputation to be the first choice for sharpening room optimization and solutions and became a world leader. ISELI's strength next to innovation and quality, - is project planning and support of complex and challenging projects for individual and practice- oriented sharpening room solutions. The ability to advice, optimize and support equipment modernization sets ISELI apart from other manufacturer and closer to its customers around the globe. If necessary we create solutions individual, based on customer needs!
